

Creative Support Services
Nyda Gilbertson.

I am an Artist and an Energy Healer.

I am a Graduate of the McKay Method School of Energy Healing. I have owned my own business; providing Hospice and Home Health Care to individuals needs including my energy work for over five years now. I have a lot of Love to share!

To feed my Soul, I paint on Thursdays (plein aire) with a group of women called the 'Crazy Mountain Women's Art League'. We get together every week to go on adventures with a picnic lunch and paint.

My particular area of interest is in Sound Healing. Over the last decade, the awareness of the uses of sound and music as healing modalities continues to expand. Edgar Cayce predicted that "sound would be the medicine of the future". I have heard my calling.

Please give me a call to set up a session!
